
DFT reference vs MLIP prediction | cluster-centered complete train and held-out test energy
A Scratch-600K
train: ρ=0.89, r=0.90
test: ρ=0.45, r=0.46
n_train=5,358, n_test=801
k = 11 clusters
B FT-600K
train: ρ=0.85, r=0.86
test: ρ=0.47, r=0.44
n_train=5,358, n_test=801
k = 11 clusters
C Scratch-MultiT
train: ρ=0.89, r=0.93
test: ρ=0.52, r=0.46
n_train=7,977, n_test=2,301
k = 16 clusters
D FT-MultiT
train: ρ=0.95, r=0.96
test: ρ=0.43, r=0.44
n_train=7,977, n_test=2,301
k = 16 clusters
