Local geometry to a conservative energy / force interface

Local environment

Equivariant features

$$h_i^{(\ell+1)} = U_\theta(h_i^{(\ell)}, m_i^{(\ell)})$$

Atomic readout

$$E_\theta = \sum_i \varepsilon_\theta(h_i)$$

$$E_\theta(q)$$

$$\mathbf{F}_{i,\theta} = -\nabla_{\mathbf{r}_i} E_\theta$$

Shared observable definitions
