a
Projected host lattice and Cr candidate sites
z (Å)
x (Å)
host Te
host Sb
b
In-plane source-site coverage
fractional y
fractional x
gap-to-QL route member
c
Vertical classification from the two central Te surfaces
Cr fractional z
candidate site rank along c
within gap
gap–QL interface
within QL
All coordinates are immutable MACE source inputs; colors are geometric regions, not stability labels.
